## Comprehension

Read the passage and answer the following questions.

Australia is a wonderful country comprising the mainland of the Australian continent, the island of Tasmania and numerous smaller islands. It is the world's sixth largest country by total area. The neighbouring countries are Papua New Guinea to the North, The Solomon Islands to the north east and New Zealand to the south east. Many people think that its capital is Sydney. Although that is the largest urban area, its capital is actually Canberra.

Although much of Australia is desert there is a wide range of other habitats too. There are many wooded areas with tropical rainforests in the wetter regions. Because it is such an isolated country it contains many plants and animals that have evolved over the years and are found nowhere else in the world. Animals like kangaroos, koalas and wombats have lived here in the wild for thousands of years!
